

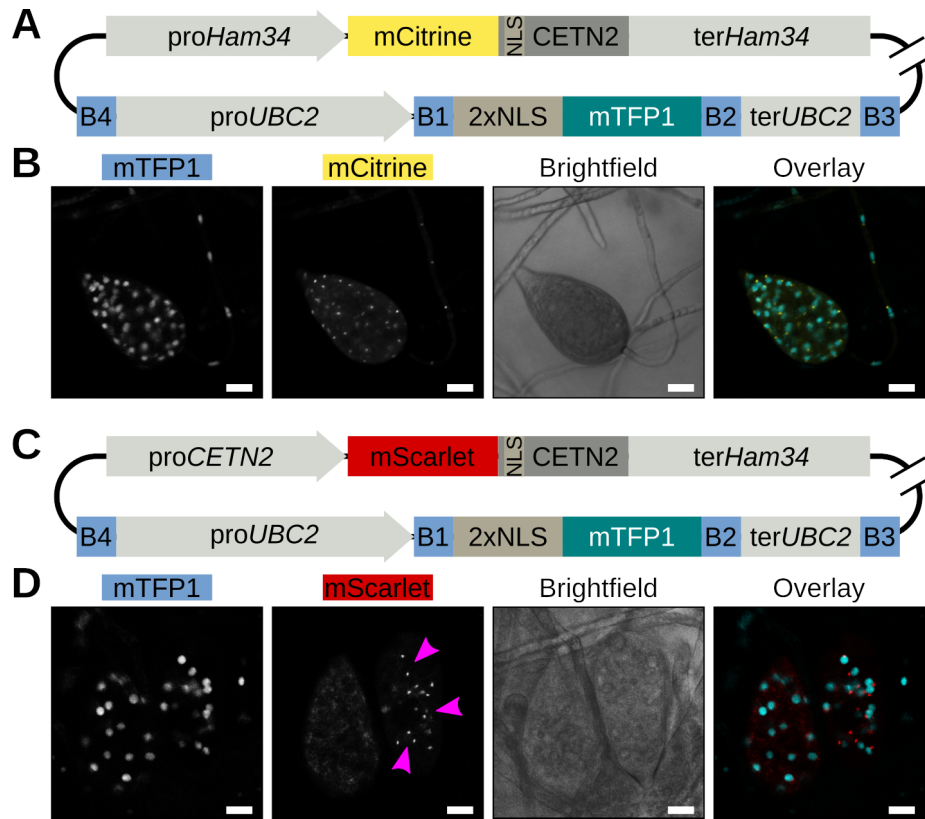

Figure S8

**Figure S8. Generation of a *P. palmivora* Centrin 2 (CETN2) reporter.** **(A)** Schematic view of the construct for Ham34-promoter-driven expression of a mCitrine:CETN2 reporter together with a nuclear-localized mTFP1. Backbone elements are not represented. **(B)** Confocal imaging of a sporangium from a *P. palmivora* LILI-NT-Ce transgenics expressing the construct shown in **(A)**. Scale bar is 10  $\mu$ m. **(C)** Schematic view of the construct for CETN2-promoter-driven expression of a mScarlet:CETN2 reporter together with a constitutively expressed nuclear-localized mTFP1. **(D)** Confocal imaging of a sporangium from a transgenic *P. palmivora* strain expressing the construct shown in **(C)**. Scale bar is 10  $\mu$ m.
